

# CashPoint

- User interface for smart safes and recyclers -

**ALVARA**  
DIGITAL SOLUTIONS

**CashPoint has a user-friendly, customizable interface, enabling you to reap all the benefits of your safes.**

## The challenges

The standard user interfaces on safes do not always cover all your functional needs and are not compatible with other cash management platforms. The management of safes is often timeconsuming and complex.

## The solution

CashPoint is installed locally on safes, using Windows. Its touch-screen interface can be used to manage all the functions of the safe (configuration, user management, reports, feedback, etc.). ALVARA's CashPoint technology enables the display of certain functions or options to be managed dynamically.

When combined with Universal platform, CashPoint accepts remote updates of users, bill sets and the application.

## The functions

- ✓ Configuration of the machine
- ✓ Management of users, including profiles and access rights
- ✓ Functions for cash deposits, envelope deposits, change, dispense, etc.
- ✓ Instantaneous exporting of transactions to Universal or another platform

- ✓ Identification using a login, a credit card or proprietary cards
- ✓ Detailed history of deposits per day or per operator and generation of reports

## The benefits

- ✓ 1500+ CashPoint licenses have been installed for different projects in 9 European countries and the USA.
- ✓ Thanks to ALVARA's technology, CashPoint is installed on safes in a few clicks. Thanks to the user-friendly and intuitive platform, a safe can be configured and made available to users in just a few minutes. The different functions are accessed directly via the home page, making them extremely simple to use.
- ✓ All ALVARA software applications are developed in-house and can therefore be adapted depending on your requirements. The platform can be customized with your company's logo thanks to a dedicated URL and generate personalized reports, while other specific developments can be implemented by our engineers.
