

ChangeExchange

- The trade platform for coins & change -

for easy and secure ordering of change via the platform with flexibly selectable delivery and payment methods

The challenges

Change is indispensable in retail, but not always in sufficient supply. For banks and savings banks, on the other hand the processes now prescribed for this are too expensive and time-consuming. Due to the difficult framework conditions in coin logistics, the coin ordering process must be optimised.

The solution

At the ALVARA ChangeExchange, financial institutions or cash-in-transit companies meet with retailers who urgently need change. This is how supply and demand, i.e. coin surplus and coin demand, are brought together 24 hours a day in an efficient and very cost-effective manner. Whether as a buyer or seller of change, the ChangeExchange platform provides a cost-effective, highly flexible and self-sufficient coin circulation system from which all sides benefit.

The functions

- ✓ Ordering change
- ✓ Delivery or pick-up
- ✓ Payment method individually selectable

The benefits

- ✓ Our sellers are banks and savings banks from all over Germany. Seriousness and security are very important to us.
- ✓ Simply pay by prepayment, Giropay, Paypal or Paydirekt and select your desired shipping method: Whether DHL, courier or self-collection, your package will reach you quickly and easily.
- ✓ The special feature of ChangeExchange is that you can not only buy rolled coins, but also loose coins. This makes it even easier and more efficient to meet your individual needs.
