

POS Connector

- Middleware for Front Office Cash Recycler management -

The POS Connector is an easy and fast implementing middleware that manages all the features of the Cash Recycler for transactions and administration.

The challenges

Cash Recyclers are becoming a “must have” in retail to automate cash handling, reduce risks and allows cashiers to spend more time servicing the customers. To fully benefit from the solution, the Cash Recycler must be integrated with the POS Software to get started automatically when a cash payment is required. This process of development & testing is complex, time consuming and expensive.

The solution

POS Connector Middleware is installed locally on the POS Software. Its friendly user interface can be used to manage the functions of the Cash Recycler. When combined with the Smart Safe Monitoring Platform, Cash Recycler's stock, transactions and technical status are centralized on a secured web portal for reporting and third-party software integration (Retailers / CIT's / Banks). POS Connector is compliant with any Windows or Android based POS Software and can manage most of the leading Cash Recyclers in the market.

The functions

- ✓ Enable fast and reliable communication between POS software and Cash Recycler

- ✓ Multi-platform : compliant with Windows & Android POS Software
- ✓ Functions for cash deposits, cash back, etc.
- ✓ Management of exceptions : Large banknotes management, Coins jamming etc
- ✓ Instantaneous exporting of transactions to the Smart Safe Monitoring Platform
- ✓ Multi-currency and multi-language

The benefits

- ✓ The middleware enables fast and reliable communication between various POS software applications and a front-office recycler. POS Connector can also be used to export data to a cloud-based reporting and automation platform.
- ✓ Thanks to the user-friendly and intuitive platform, a Cash Recycler can be configured and made available to users in just a few minutes. The different functions are accessed directly via the main menu, making them extremely simple to use.
- ✓ All ALVARA software applications can be adapted depending on your requirements. The platform can be customized with dedicated specific features.
