

Pecunia

- The software for your cash center -

ALVARA
DIGITAL SOLUTIONS

Our software helps you to meet the increasing requirements of cash-in-transit companies.

The challenges

Cash-in-transit companies face numerous challenges, such as the steady increase in coin volumes, specific customer requirements, massive cost pressure as well as increasing competition in the industry. Our solutions optimise your digital processes, ensure more cost efficiency and complete traceability.

The solution

Pecunia of it kompetenz GmbH is a reliable tool for cash management and is already successfully in use at numerous value service providers and banks. Composed of various modules, Pecunia supports especially in the areas of cash and value handling. The software fulfills all functions around the systematic control of counts, service orders and billing. All modules access a central database.

The functions

- ✓ Cash processing & video surveillance
- ✓ Route planning & container logistics
- ✓ Master data management

- ✓ Reporting & Invoice
- ✓ CashEDI
- ✓ Mobile ticketing & troubleshooting services

The benefits

- ✓ Pecunia convinces by a user-friendly interface and thus enables an intuitive operation.
- ✓ Individual customer requirements for the preparation and transmission of data are easily met thanks to the interfaces to external systems. Save time by automated mail dispatch and Excel exports.
- ✓ Pecunia provides more security in your cash handling. By the exact control of the access rights you are protected against unauthorized access. Counts are effectively controlled by video surveillance and optional 4-eyes principle. The comprehensive logging increases the transparency of your processes.
