

RETAIL 360

- Vault management software for retailers -

Say goodbye to manual processes and Excel sheet thanks to RETAIL 360, our easy-to-use and reliable web-based software solution.

The challenge

Cash management processing operations are complex and costly for distributors: Preparation, counting and processing operations are time-consuming and costly. It is difficult to keep cash secure (theft, fraud, etc.) and the availability of the cash at the bank is deferred.

The solution

Installed on our servers or in your premises, RETAIL 360 is built around a central database that allows access to real-time data from any location. RETAIL 360 is a comprehensive software application that manages all vault operations in one place: integration of POS data, counting, packing, petty cash, multi-currency stock management, data exporting and reporting concerning all means of payments. Our software solution helps you meet the increasingly demanding requirements of modern retail companies.

The functions

- ✓ POS integration
- ✓ Counting
- ✓ Petty cash

- ✓ Bank in / out
- ✓ All means of payments
- ✓ Data exporting & reporting

The benefits

- ✓ ALVARA | Digital Solutions has been providing software solutions to retail companies for 30+ years. Our extensive expertise in vault management and our team of experts specializing in new technologies ensure that relevant and innovative solutions are proposed to our clients.
- ✓ The user-friendly and intuitive interface enables seamless operation. Training is made fast and easy, while the simplicity of the solution dramatically reduces user errors that would occur with a more complex system.
- ✓ All ALVARA software applications are developed in-house and can therefore be adapted to your specific requirements.
