

ITR POS solution

- The Software behind Checkout Products -

Make checkout operations secure, efficient and easy with the ITR POS solution.

The challenges

The manual processes in old POS systems make operation inefficient, non-transparent and prone to errors.

The solution

The ITR POS solution lets retail branches and chains optimize their checkout processes. Precise product allocation speeds up the checkout process as well as returns management. Additional systems can also be connected. Tasks such as evaluations and bookkeeping are made easier. Securely, transparently and efficiently.

The functions

- ✓ Central data management
- ✓ Checkout synchronization
- ✓ eBon – digital receipts
- ✓ Advertising on the customer display
- ✓ Mobile service with Orderman connection (© NCR)
- ✓ New payment systems – (EC, ApplePay, credit etc.)

- ✓ Custom menus and table functions
- ✓ Integration of customer cards and individually configurable discounts

The benefits

- ✓ The ITR POS solution can be used independently from your hardware. Countless external devices, such as EC terminals, scales, payment machines etc., can be connected to the checkout and configured in just a few steps.
- ✓ The ITR POS solution interface to the tax office is Audicon-certified as well as GDPR/GOBD-compliant. This ensures the system meets the high security standards that retail branches have to uphold in daily business.
- ✓ Thanks to the efficient interplay of stable software, rapid implementation of custom requests, flexible configuration and 24/7/365 support, individual customer requests are always supported by the software.
